

Braille Neue

Character with Braille.

Character with Braille.

Project Information (EN)

My project often began as an investigation into the potential of communication. For me, the design is a method to bridge the gap between people. Through my work, I seek to design products and services that connect people who were previously unconnected.

Projectinformatie (NL)

Braille Neue is a universal typeface that combines braille with existing characters, so it can be read by both sighted and visually impaired. Bridging the gap between visually impaired and sighted acting as a trigger for communication and growth between t
