Game Changers Asia - Circular Design Conference

Hosted by: CreativeNL, ENTRY

Project Information (EN)

What to expect

The programme is part of 2023 Dutch Design Week. The conference speakers will discuss what circular alternatives we should design and how we can design systemic change, present tangible solutions and visualize different perspectives. All from an East - West perspective. At 2023 Dutch Design Week we will welcome several incoming delegations from Hong Kong, China, Japan and Indonesia. Together with Dutch designers and innovators, they venture into circular design from the angle of cross-cultural collaborations, societal challenges and different cultural backgrounds. With mind-blowing presentations and new proposals on how we can circularly design our systems, our built environment and the everyday goods we consume.

Conference speakers

- Devana Ng - #Invisible Bag (co-founder) - Gosha Muhammad - Ōd Architecture Studio (principal architect) - Ivana Mik - Fou Food Lab (mad food scientist) - Lucas de Man - DDW Embassy of Circular & Biobased Building (creative leader) - Monique Knapen - CreativeNL (Asia focus) - Omar Ali - Metabolic (commercial & partnerships lead) - Pim van Baarsen - Social designer (winner Dutch Design Awards 2023) - Roger Wu - HongKong Design Centre (curator & architect) Moderated by: - Emmy Scholten - Metabolic (commercial director)

Projectinformatie (NL)

Dit kun je verwachten

Dit programma is onderdeel van de Dutch Design Week 2023. De sprekers op de conferentie bespreken welke circulaire alternatieven we moeten ontwerpen en hoe we systemische verandering kunnen ontwerpen, tastbare oplossingen kunnen presenteren en verschillende perspectieven kunnen visualiseren. Alles vanuit een Oost - West perspectief. Op de Dutch Design Week 2023 verwelkomen we verschillende inkomende delegaties uit Hong Kong, China, Japan en Indonesië. Samen met Nederlandse ontwerpers en innovators wagen zij zich aan circulair ontwerpen vanuit de invalshoek van cross-culturele samenwerking, maatschappelijke uitdagingen en verschillende culturele achtergronden. Met mind-blowing presentaties en nieuwe voorstellen over hoe we onze systemen, onze gebouwde omgeving en de dagelijkse goederen die we consumeren circulair kunnen ontwerpen.
