Solar Object

Hosted by: Zhijian Xiong

Project Information (EN)

A self-sustaining luminary unit

Solar Object’s ambition is to visualize the simple relation between solar energy and consumable lighting. By looking away from specified context, we morphed our understanding of what needed to complete a full circle of energy transformation into a single-unit, solar-powered lamp with a robust, brutal yet mobile appearance. Through unobscured materiality and hands-on playfulness of the design, we seek to inspire thinking on current threats to humanity and potential future outlooks.
