## Project Information (EN)

## "I need the sea because it teaches me the best I can be"

The collectibles by Sandra range from glass vessels to tapestry, a mesmerizing pendant where glas and textile is brought to live in an enchanting mix and her wall coverings. They all appear to be morphing or otherwise on the move. All objects created from there one resulted in amorf natural forms and each hold an unique emotion. They therefore embrace your brain and relax through shape, texture and colors. Her vivid imagination of the unraveling of material form and her thoughts processed in bold colors, various materials, treatments, textures and techniques literally makes you part of her work. With a human-centric tough to evoke stimulating your own imagination. She builds her latest pieces by hand painting, collaging and implementing 3D techniques for the base forms and translating these with passmenetery, weaving and glass blowing into her handmade yarn landscapes, tapestry landscape & glass vessels. Their forms invites you to engage with them rather than just look at them. Ultimately, her “little Omen’s as nature, universe and life forms,” are an appeal for “open-mindedness. sensory play and looking forward. They are meant to be hopeful.

## Projectinformatie (NL)

## "I need the sea because it teaches me the best I can be"

De verzamelobjecten, variërend van glaswerk tot wandtapijten, een betoverende wandlamp waar glas en textielkunst elkaar omarmen, en haar wall coverings lijken te veranderen of anderszins in beweging te zijn. Alle objecten resulteerden in amorfe natuurlijke vormen en elk met een unieke emotie. Ze omarmen daarom je hersenen en ontspannen door vorm, textuur en kleuren. Haar levendige verbeelding van het ontrafelen van de materiële vorm en haar gedachten verwerkt in gedurfde kleuren, verschillende materialen, behandelingen, texturen en technieken maken je letterlijk onderdeel van haar werk. Met een op de mens gerichte benadering om je eigen verbeelding te stimuleren bouwt ze haar nieuwste stukken door met de hand te schilderen, collages te maken en 3D-technieken te implementeren voor de basisvormen waarna deze te vertalen in haar handgemaakte garens, wandtapijten landschap en glaswerk. Hun vormen nodigen uit om met ze in gesprek te gaan in plaats van er alleen maar naar te kijken. Uiteindelijk zijn haar ‘kleine Omen’s als natuur, universum en levensvormen’ een oproep tot ‘openheid van geest. Een zintuiglijk spel en vooruitkijken met hoop.
