

499 Seconds Ago

between light and gaze
between light and gaze

Hosted by: Kieran Hinde (Graduate Rietveld 2021)

Project Information (EN)

These light sensitive devices mediate between the natural phenomenon of light and gaze.

Drifting through space, orientating towards light they create a subtle play by making the color spectra of light visible. Through artificial construction this work invites you to slow down and consider the existence of light as it naturally occurs.

Projectinformatie (NL)

These light sensitive devices mediate between the natural phenomenon of light and gaze.

Drifting through space, orientating towards light they create a subtle play by making the color spectra of light visible. Through artificial construction this work invites you to slow down and consider the existence of light as it naturally occurs.
