Bio Iridescent Sequin

Biodegradable glittering sequins from wood
Biologisch afbreekbare glinsterende pailletten van hout

Project Information (EN)

The Bio Iridescent Sequin manifests as a holistic alternative to the hazardous plastic sequin. Made entirely from cellulose, the most abundant plant-based polymer which is present in all plants, the material’s origin and compostable nature form a biologic

Projectinformatie (NL)

De Bio-Iridescent Sequin manifesteert zich als een holistisch alternatief voor de gevaarlijke kunststof pailletten. Volledig gemaakt van cellulose, het meest voorkomende plantaardige polymeer dat in alle planten aanwezig is, vormt de oorsprong van het mat
