

Liquid Colours

A study of colour, reflection and light.

A study of colour, reflection and light.

Hosted by: Studio Stella Verdult

Project Information (EN)

It all started with a 'Playdate'.

'Playdate' is an initiative by Stella Verdult, with the sole purpose of having fun within a creative context. The use of basal materials such as paper, plastic, textile and paint softens the expectations and simplifies the creative process, letting serendipity run its course. By inviting Sanne Schuurman, the two designers started studying the reflection and fluidity of a new found liquid colour pallet. These colour studies can be used as building blocks for future works and collaborations. The studies that are showcased during this edition of the Dutch Design Week are the results of a hybrid Playdate, during which Sanne Schuurman and Stella Verdult both worked on the same topic; 'Liquid Colours', but at a different location. They reacted on each others work, choices and vision, resulting in this playful installation.

Bring a visit to one of the live Playdates!

Stella Verdult will also be hosting 2 live Playdates at Plan- B, on the 25th and 27th of October 2022. You are welcome to come and have a look, while Verdult creates new work with artists Valentine Cloix, Alice Bureau and Cindy Bakker.
