

The Body as Reference for (R) Evolution

A site-specific piece. An immersive, sculptural, durational performance.

A site-specific piece. An immersive, sculptural, durational performance.

Hosted by: United Cowboys

Project Information (EN)

Sommerblut Festival Co-Creation

Since 2014, United Cowboys builds monumental travelling site-specific biotopes. BIOTOPE is a site-specific piece that the United Cowboys have worked with in various contexts over the past years - an immersive, sculptural durational performance that combines dance, performance art and objects. These are self-sufficient durational environments, in which dancers, performers and musicians are present. The space is being redefined individually. The audience can walk around to observe and absorb this world from all angles. It can stop to watch, it can move on, step out and return. This organic space adopts and transforms naturally over time, giving space to both the performer and the audience to share space, perspectives, mentality, views, challenges and individuality. It is a highly inclusive, collaborative artistic format that can be transferred to various contexts. Collaboration between artistic directors, Maarten van der Put and Pauline Roelants, and guest artists in the context of Sommerblut Festival, Cologne 2022. Open walk-in between 18:30-22:30 possible!
