

Soft World

MESSMERIZING

MESSMERIZING

Hosted by: Teun Zwets

Project Information (EN)

Teun's foam extravaganza

During the Messmerizing exhibition, Teun Zwets presents his brand new Soft World. Off-cut pieces of foam from reclaimed mattresses are used to give shape to a series of new furniture. The dialogue between the shapes of the foam and the quick and dirty stitching in the upholstery incite the rough aesthetic of the extravagant lamps, chairs, wall-pieces and consoles.

Projectinformatie (NL)

Teun's foam extravaganza

Tijdens de tentoonstelling Messmerizing presenteert Teun Zwets zijn gloednieuwe Soft World. Stukken schuim van gerecyclede matrassen worden gebruikt om vorm te geven aan een reeks nieuwe meubels. De dialoog tussen de vormen van het schuim en de snelle en grove stiksels in de bekleding insinueren de ruwe esthetiek van de extravagante lampen, stoelen, wandstukken en consoles.
