

De Dutjesdome

Is it possible to design a moment of serenity?

Dutjesdome

Hosted by: Dion Visser

Project Information (EN)

De Dutjesdome

With this question in mind, we set of to design an experience in space and sound to evoke a moment of relaxation and serenity; De Dutjesdome. Deployed at Wildeburg 2022 as an ultimate retreat spot to recharge, a space for a powernap deluxe, controlled by a soundscape and supported by cushions. But will this work out as designed? Can you effectively design an interaction, or is it up to the visitors and thereby participants to determine what the space will be and mean?
