

interCHANGES | DIGITAL FUTURE

This session is for everyone who explores the digital realms. What role do we all play in developing technology. What if our future is analogue...

This session is for everyone who explores the digital realms. What role do we all play in developing technology. What if our future is analogue...

Hosted by: Dutch Design Foundation

Project Information (EN)

In what way are virtual worlds, ai & global platforms developed? How to shape our digital future?

AI is on the verge of disrupting business as usual in many industries. In particular tech evolution provides digital designers with abundant opportunities to create impactful products. However, tech is not innocent: it harbors discriminatory algorithms, data privacy risks, etc. What dilemmas emerged? Whose responsibility is its ethical development? Lianne Buik (artist-futurist & AI ethics consultant) wonders how we can address the ethics of tech with grace. Are we on the cusp of a new era that will bring a revaluation of the balance between the digital and analogue? Programme Thursday 26 Oct Moderated by Tracy Metz (John Adams Institute) & Wouter van Noort (NRC Future Affairs). English. 17:30 | Doors open 18:00 | Keynote by Lianne Buik (artist-futurist & AI ethics consultant) 18:15 | Q&A fueled by Liva Grinberga (Design Director Media Monks) Eline Deutekom (Creative Director Reyez!) 18:30 | InterCHANGES break-out sessions (*more info below) Session I - Listening, talking, thinking Session II - Muzus Stretches Session III - Miro Mission Mindmapping Session IV - Changemaker Labs by Studio Futurall 19:30 | Reflective Pause 19:45 | Conclusions 20:00 | End

*InterCHANGES break-out sessions I & II

Session I - Listening, talking, thinking. An in-depth philosophical dialogue. Deepen your thoughts around entangled tech matters by joining a conversation with keynote speaker Lianne, Liva, Eline, BNO Class of 23 Graduate Madelief Kok (HKU - Environmental Amnesia) and a Dutch Design Award Nominee. Guided by moderators Tracy and Wouter. Session II - Muzus Stretches: an introduction workshop into Muzus' Methods that reach beyond. What if challenging OUR DIGITAL FUTURE is mainly a social challenge? Then what can digital designers, involved policy makers and researchers learn from a social design practice? Discover your potential plan of action to complex challenges with diverse stakeholders. By learning from this pioneer's best practices in societal transitions and social issues. Muzus is a Dutch Design Week 2023 Beacon.

*InterCHANGES break-out sessions III & IV

Session III - Miro Mission Mindmapping with peers. Miro, together with partner Neat, sets up their latest version of a lifesize visual workspace for innovation. There, under the guidance of Alain Dujardin (Greenberry), Marsha Simon (DDF) and Wessel van den Bos (Miro) Dutch Digital Design hosts a realtime co-creation session with Amber Haank & Sjors van Hoof (Ace). What are the lessons learned from their project Miss Journey? What do you think are the required first steps to take to pave the way for a brighter digital future? How to develop further? Session IV - Changemaker Labs by Studio Futurall: building new forms of collaboration. How could citizens, researchers, digital designers and policy makers collaborate to help develop tech in a positive way? A workshop by Studio Futurall to find out what kind of changemaker you personally are and create a better understanding how to form valuable collaborations. A chance to meet people with similar missions, in diverse roles and different approaches.
