

Sisu Light Sculptures

Hosted by: Studio Rik ten Velden

Project Information (EN)

Sisu

The designs of the Sisu light sculptures were born at times when most of us are challenged in one way or the other. Sisu is translated as strength of will, determination, and perseverance. According to Rik, one way of achieving your goals is to find a balance between fluidity and persistence. The Sisu lights aim to reflect this thinking. Sisu is not only a lamp. It is a sculpture, a mirror, a light, and a decoration that brings fluidity and elegance together. The innovation of the lamp is in its efficiency in the creation process. Cast resin frames are created in molds that can be used endless times, saving energy and waste.
