

Driving sustainable progress

Hosted by: Polestar

Project Information (EN)

From materials to impact on the road

DDW's focus on innovation and sustainability aligns seamlessly with our own ambitions. In our mission to make sustainable mobility the norm, we combine minimalist design, responsible materials and renewable energy to create high-performance cars without compromising on performance. At DDW, we are presenting the newest member of our family: the Polestar 4 SUV. With this, we take the step from invisible innovation on the drawing board to concrete, tangible mobility on the road.

Projectinformatie (NL)

Van materiaal tot impact op de weg

De focus van DDW op innovatie en duurzaamheid sluit naadloos aan bij onze eigen ambities. In onze missie om duurzame mobiliteit de norm te maken, combineren we minimalistisch design, verantwoorde materialen en groene energie tot hoogwaardige auto's, die geen concessies doen op performance. Op DDW presenteren we ons nieuwste lid van de familie: de Polestar 4 SUV. Daarmee maken we de stap van onzichtbare innovatie op de tekentafel naar concrete, tastbare mobiliteit op de weg.
