Project Information (EN)

Italian Design Day

On behalf of The Embassy of Italy in the Hague, the Italian Trade Agency, and the Italian Cultural Institute, we are pleased to invite you to the seminar “From Vertical Forests to Nature-Based Cities – Scaling Nature-Based Solutions from Green Buildings to Inclusive, Climate-Resilient Neighbourhoods” to celebrate the 10th edition of Italian Design Day.

Together with international experts in the field, we will explore how we can move from using nature as an architectural element in buildings towards nature-inclusive urban development.

During the seminar, we will explore how Nature-Based Solutions can contribute to greater biodiversity and ecological infrastructure, inclusive and affordable urban development, a healthier living environment for both people and nature, and a new generation of NatureBased Cities.

Featuring inspiring perspectives from the fields of architecture, social housing, landscape architecture, ecology and urban resilience.

How can we translate the lessons from one iconic building into strategies for entire neighbourhoods and cities?

Projectinformatie (NL)

Italian Design Day

Namens de Ambassade van Italië in Den Haag, het Italiaans Handelsagentschap en het Italiaans Cultureel Instituut nodigen wij u graag uit voor het seminar “From Vertical Forests to Nature-Based Cities – Scaling Nature-Based Solutions from Green Buildings to Inclusive, Climate-Resilient Neighbourhoods”, ter gelegenheid van de 10e editie van Italian Design Day.

Samen met internationale experts op dit gebied onderzoeken we hoe we de stap kunnen maken van het gebruik van natuur als architectonisch element in gebouwen naar natuurinclusieve stedelijke ontwikkeling.

Tijdens het seminar bespreken we hoe Nature-Based Solutions kunnen bijdragen aan meer biodiversiteit en ecologische infrastructuur, inclusieve en betaalbare stedelijke ontwikkeling, een gezondere leefomgeving voor zowel mens als natuur, en een nieuwe generatie natuurinclusieve steden.

Met inspirerende inzichten vanuit de vakgebieden architectuur, sociale woningbouw, landschapsarchitectuur, ecologie en stedelijke veerkracht.

Hoe kunnen we de lessen uit één iconisch gebouw vertalen naar strategieën voor complete wijken en steden?
