On October 21st, Drinks, Pitches & Demos will be present at Manifestations during Dutch Design Week for a special edition to celebrate the intimate relation between innovation and humanity. How does technology shape us and how do we shape technology? What is the future of technology and how can we coexist with it? During this event, you will meet ambitious entrepreneurs who will pitch how their projects aim to revolutionize technology and provide solutions to today's world problems.

After a dynamic and fun pitching session, we will wrap it up with drinks and networking. This event is open to anybody, but please register confirm your presence.

Are you a start-up, designer or inventor and would like to pitch during the event?

Design week. Pitch night.

During Dutch Design Week, Eindhoven is full of people looking for what's next. On 22 October, Demos, Pitches & Drinks brings startups into that mix. We go live at Manifestations in the VEEM building, where technology and design meet.

Founders pitch, engineers demo, and the DDW crowd joins the Brainport community for drinks.☐☐

What to expect

17:00 — Doors open, first drinks in hand

17:15 — Founders on stage, ideas on the table

17:45 — The room shoots back — questions, doubts, compliments

18:15 — Open mic — your idea, your one minute

18:30 — Drinks, and the conversations that actually matter

Want to pitch or demo?

Take the stage and tell your story. Email [info@gerardanton.com]
