

Alu Weaves

Hosted by: Studio Wantia

Project Information (EN)

3 playful objects

Studio Wantia researches the potential of a discarded material: aluminium. Aluminium tubes are used as an integrated weaving material, transforming the aluminium through color and pattern, and merging rigidity with tactility. Resulting in three playful objects.

Projectinformatie (NL)

3 speelse objecten

Studio Wantia onderzocht aluminium buizen als geïntegreerd weefmateriaal en als drager van print. Door middel van verschillende technieken ontstaat er een spel tussen print, zachtheid van textiel en rigide industrieel materiaal.
