

Wasteland to Living Room

Project Information (EN)

As populations grow, so too does the demand for raw materials. Metals are no exception. The electric and renewable future we strive towards as a society has discomforting material implications; in a wind turbine alone, nearly 5 tonnes of copper are needed

Projectinformatie (NL)

Met de toename van bevolkingen groeit ook de vraag naar grondstoffen. Metalen zijn hierbij geen uitzondering. De elektrische en duurzame toekomst die we nastreven heeft verontrustende materiële implicaties; alleen al in een windturbine zitten bijna 5 ton
