

FULU

Haptic fingernail to bring sense of touch to daily digital communication.
Haptische nagels om tastzin in dagelijkse digitale communicatie te brengen.

Hosted by: Ryo Tada

Project Information (EN)

Currently, digital experiences are focused on the audio-visual whilst other human senses are fundamentally neglected. Of these other sensory systems, touch is important for creating trust and empathy, such as when babies first create a connection with

Projectinformatie (NL)

Momenteel is de ervaring van digitale media vooral gericht op audio-visuele input, maar onze andere zintuigen worden nog grotendeels genegeerd. Tastzin is een van de belangrijkste zintuigen om vertrouwen en empathie op te wekken. Zoals het eerste contact van
