

Aiki

Providing autonomy to children during medical treatment.
Autonomie voor kinderen tijdens een medische behandeling

Hosted by: Studio Uncoated

Project Information (EN)

Medical encounters can leave a deep mark on the psyche of a child. They are often unnecessary frightening and stressful. The main aim is to bring autonomy back to the child by giving them a method of expression. The child receives the cuddle that will giv

Projectinformatie (NL)

Medische behandelingen kunnen een diep effect hebben op de psyche van kinderen. Vaak zijn dergelijke behandelingen enorm beangstigend en stressvol. Aiki geeft kinderen meer controle over hun ervaring. Tijdens de behandeling ademt deze knuffel ritmisch met
