Carbon-aware internet application design

Hosted by: Lu Ye

Project Information (EN)

The digital industry is the next one to surprise you with its startling energy consumption and carbon emission. The internet industry accounts for 3.7% of global greenhouse gas emission, which is the same amount as the aviation industry, according to some

Projectinformatie (NL)

De digitale industrie heeft een verbazingwekkend energieverbruik en CO2-uitstoot. Volgens sommige schattingen is de internetindustrie verantwoordelijk voor 3,7% van de wereldwijde uitstoot van broeikasgassen, hetzelfde aantal als de luchtvaartindustrie.
