

Geo Design - SAND

in collaboration with Design Academy Eindhoven

i.s.m. Design Academy Eindhoven

Hosted by: Van Abbemuseum

Project Information (EN)

After water, sand is the most used natural resource on earth. It's everywhere: from the buildings we live in and the glasses we wear, to the silicon chips in our computers and smartphones. And sand is becoming scarce. Which can lead to smuggling and even

Projectinformatie (NL)

Zand is na water het meest gebruikte bronmateriaal op aarde. We vinden het overal in terug, van de gebouwen waarin we leven en de brillen die we dragen tot de siliconenchips in onze computers en smartphones. En zand wordt schaars, wat kan leiden tot smokk
