

SPHAN | THE LAND OF RABBITS

created at Montemero Art Residency 2020

gemaakt tijdens mijn verblijf in Montemero Art Residency 2020

Project Information (EN)

during my stay at the residency, I encountered wild rabbits in the area, which led me to research their digestive system and feces. rabbits are coprophagic animals, meaning, they reingest their own droppings in order to utilize nutrients that are initiall

Projectinformatie (NL)

tijdens mijn verblijf in de residentie kwam ik wilde konijnen tegen in het gebied, wat me ertoe bracht om hun spijsverteringssysteem en ontlasting te onderzoeken. konijnen zijn coprofagische dieren, wat betekent dat ze hun eigen uitwerpselen opnieuw eten
