

Nature is Under your Feet

Discovering London's underground landscape as a potential new nature

Project Information (EN)

The project 'Nature is Under your Feet' focuses on the city of London, where twelve former tributaries of the river Thames are currently buried under layers of concrete and still flow beneath the city. For one of these flows – the former River Fleet – a s

Projectinformatie (NL)

Het project 'Nature is Under your Feet' focust zich op de stad Londen, waar zo'n twaalf voormalige zij-beken van de Theems onder lagen van beton begraven liggen en als stille waterlopen nog steeds onder de stad doorstromen. In de uitwerking van één van de
