

Co/Lab: Innovating our defense with society

What if.. innovating with society was the game-changer to keeping us safe?

What if.. innovating with society was the game-changer to keeping us safe?

Hosted by: Tabo Goudswaard, Joanne Houmes, Muzus, Ministerie van Defensie Commando Materieel & IT (Directie Kennis & Innovatie)

Project Information (EN)

Innovating with society

Security is not just the government's job; it is your responsibility too. That is why The Ministry of Defence wants to work not only for citizens, but with them. Everyone has knowledge, experience or creativity that can contribute. Young or old, entrepreneurs to local residents: together we can develop innovative solutions that would often remain unnoticed without the input of citizens. Through new and accessible forms of collaboration, surprising ideas can emerge that allow us to draw on the innovative potential that is present in society.

Dutch Design Week

During Dutch Design Week, we invite you to join us in an experiment to explore how citizens and Defence can best work together. How can your knowledge and experience help keep the Netherlands safe? Join us during Dutch Design Week!

Projectinformatie (NL)

Innoveren met de samenleving

Veiligheid is niet alleen een taak van de overheid; het is ook jouw verantwoordelijkheid. Daarom wil Defensie niet alleen vóór burgers werken, maar vooral ook mét burgers. Iedereen heeft kennis, ervaring of creativiteit die kan helpen. Van jong tot oud, van ondernemers tot buurtbewoners: met elkaar kunnen we tot innovatieve oplossingen komen die zonder input van burgers vaak onopgemerkt blijven. Door nieuwe, laagdrempelige samenwerkingen ontstaan verrassende ideeën én kunnen we het onbenutte innovatiepotentieel in de samenleving aanboren.

Dutch Design Week

Tijdens Dutch Design Week gaan we samen met jou het experiment aan om erachter te komen op welke manier burgers en Defensie het best kunnen samenwerken. Welke kennis en ervaring zet jij in om Nederland veilig te houden? Doe mee tijdens Dutch Design Week!
