

Water as Leverage for Resilient Cities Asia

Project Information (EN)

Water around the world is not only the most important risk factor, but is the biggest all-encompassing challenge. Water has the potential for transformative and sustainable impact and a comprehensive cultural shift. This is the idea behind Water as Lev

Projectinformatie (NL)

Want water is wereldwijd niet alleen het belangrijkste risico, maar ook de grootste verbindende uitdaging. Water biedt de mogelijkheid voor transformatieve en duurzame impact en alomvattende culturele verandering. Dat is de gedachte achter 'Water as L
