

Re-stack

A separable carpet design
A separable carpet design

Project Information (EN)

Re-stack is a separable and circular carpet design that aims to prevent old textiles from being landfilled or incinerated. While collaborating with Aquafil, producers of the polyamide fibre Econyl, recycled from old fishing nets, it was my aim to develop

Projectinformatie (NL)

Re-stack is a separable and circular carpet design that aims to prevent old textiles from being landfilled or incinerated. While collaborating with Aquafil, producers of the polyamide fibre Econyl, recycled from old fishing nets, it was my aim to develop
